GOOD TIDINGS OF GREAT JOY
“Glad tidings” is an old-fashioned phrase that means to share important news or information that is likely to be welcomed. If someone says, “I bring you good tidings!” It probably means they have information to share that you’ll probably like.
The phrase “good tidings” is often used in the context of Christmas. For example, in the 16th century carol, “We Wish You a Merry Christmas”, there is a line that goes “Good tidings we bring to you and your kin”. In the King James Bible, Luke 2:10 features the phrase “good tidings of great joy” when an angel delivers news of the Savior’s arrival.
Christmas is a time when we remember a wonderful story in the Bible from the shepherds that were watching over their flock at night. I’m sure that night wasn’t any different than any other night. Maybe they counted all the sheep to ensure there were no strays that had wandered off. They might have been checking the sheep for any injuries and tending to their needs. Later there was supper around a fire eating their bread and cheese. They were keeping their eyes open for any wild animals that may be lurking nearby. Just the normal routine evening, nothing out of the ordinary.
All of a sudden, out of nowhere, an angel appeared unto them and the glory of the Lord was bright all around them, and they were really afraid. Luke 2:10-11, “And the angel said unto them, “Fear not: for,

behold, I bring you good tidings of great joy, which shall be to all people.” The good tidings of great joy that the angel delivered to the shepherds and that the angel declared to them was, “For unto you this day is born in the city of David a Savior, which is Christ the Lord.”
The angel goes on to tell the shepherds the babe would be wrapped in swaddling clothes lying in a manger. Suddenly there were with the angel a multitude of heavenly host praising God and saying, “Glory to God in the highest, and on earth peace, good will toward men.”
The shepherds talked among themselves about what had just happened to them. They decided to go check out the news from the angels and found it so. They found Mary and Joseph and the baby wrapped in swaddling clothes. The shepherds were telling many people what they had witnessed and seen. But Mary kept all these things and pondered them in her heart.
A seven-hundred-year-old prophecy given by Isaiah had come to pass. Yes, it was “good tidings” of great joy to all people. Jesus Christ is the source of great joy for all people. He is central to God’s plan for His children. AMEN. SO BE IT (7.11.24)

Public Service
Announcement
Fuel Safety
Provided by Your
Local Emergency
Management Office
Accidents in the handling, use and storage of gasoline, gasohol, diesel fuel, LP-gas and other petroleum products (solvents, paint thinners and naphtha) can result in serious fires and explosions. The chances of fire or explosion can be reduced by following safety precautions and by keeping fuel storage facilities in top condition.
1. Never store fuel in food or drink containers.
2. Locate fuel storage tanks away from buildings.
3. Watch for leaks or deterioration in fuel storage and delivery equipment.
4. Keep fuels away from children.

Flammable Liquids and Gases
Gasoline, diesel fuel, LP gas, degreasing solvents, paint solvents and certain paints are among flammable materials. Keep these liquids away from open flames and motors that might spark. Keep all petroleum storage and handling equipment in good condition and out of reach of children. Inspect for leaks, deterioration or damage. Never store fuel in food or drink containers.
When transferring farm fuels, bond the containers to each other, and ground the one being dispensed from to prevent sparks from static electricity. Clean up spills right away and put oily rags in a tightly covered metal container. Change your clothes immediately if you get oil or solvents on them.
In addition, watch out for empty containers that held flammable or combustible liquids. Vapors might still be present. Store these liquids in approved containers in well-ventilated areas away from heat and sparks.
Be sure all containers for flammable and combustible liquids are clearly and correctly marked. Read and heed directions on all product containers, noting flammability and safety precautions.
Do not keep gasoline inside the home or transport it in the trunks of automobiles or recreation vehicles. If gasoline must be transported, carry only a small amount in a labeled safety can on the floor of the back seat. Roll down the windows so moving air can sweep

away vapors.
Before cutting or welding a fuel tank, fill it with water to drive out any lingering residue or vapor. Many explosions have resulted from using a torch on a tank that was thought to be empty.
Refueling
Be cautious during refueling. Fires and explosions can happen. Besides being a fire hazard, spilled fuel can cause irritation and discomfort if it contacts the skin. Breathing an excess of fuel vapor often causes dizziness and headache.
When arriving to refuel, drive up to the fuel pump or storage tank slowly. Be careful not to bump it. Turn off the engine, and extinguish smoking materials. If the engine is hot, allow it to cool for a few minutes. Position yourself so you can refuel without slipping or becoming fatigued. Remove the fuel cap slowly and allow the pressure to dissipate.
Avoid over filling. Allow any spilled fuel to evaporate before starting the engine. After releasing the nozzle valve

to shut off fuel flow, keep the nozzle in the filler opening a few moments to allow it to empty. Check vents to be sure they’re not clogged, and replace the filler cap. Then lock up the pumps so children and other unauthorized persons cannot pump fuel.
Refuel small equipment outside – never in an enclosed area. A funnel will make the job easier when using a safety can.
Wipe up spills and allow the excess to evaporate before starting the engine. Before resuming work, put the safety can back into safe storage.

Don’t Text And Drive
Provided By Your
Local Emergency
Management Office
Your Local Emergency Management Office recommends you not use your cell phone while driving. However, if you must call when behind

the wheel, it is suggested that:
•Recognize that driving requires your full attention.
•Before you get into the car, become familiar with the phone's features.
•Use the phone only if it's absolutely necessary.
•Use the phone only when and where it's safe to do so.
•Ask a passenger to place the call for you and to do the talking.
•Keep the call short.
•Tell the person at the other end that you're driving.
•Get off the phone as soon as possible—especially in traffic or bad weather.
•Don't combine a phone conversation with other distractions.
•Secure your phone so it doesn't become a projectile in a crash.
