## Lewis re-appointed to legislature’s task force on artificial intelligence

from front  
gic AI adoption, while also examining the governance structures and regulatory frameworks needed to guide its development. Special attention will be given to the role of data centers and digital infrastructure in supporting AI technologies. By identifying best practices and forward-looking policies, the task force aims to ensure that Kentucky is well-positioned to harness the benefits of artificial intelligence while safeguarding the public interest.

House Majority Caucus Chair Suzanne Miles added, “The use of artificial intelligence in our daily lives has grown dramatically over the last several years and we have to have laws and regulations in place to both guide state government’s use and protect consumers. We’ve taken important steps, but the work is far from done. I look forward to seeing the results of this interim’s efforts.” Task force members will meet throughout the

2025 Interim and submit their findings and recommendations to the Legislative Research Commission for referral to the appropriate committee or committees for consideration during the 2026 Regular Session of the Kentucky General Assembly

To follow the task force and other legislative work, visit legislature.ky.gov or follow the House Majority Caucus on Facebook and YouTube @KYHouseGOP.
