PUBLIC NOTICE

The Boyle County, in partnership with the Kentucky Association of Counties (KACo), will hold a Reverse Online Auction on 6/12/2024 1 :30:00 PM CDT to purchase 1 Ton of road salt for the Boyle County local government road department.
For bid participation, registration, and specifications, please contact Orbis Online at (502) 208-1007 ext. 701, or visit www.kacoauctions.com. You can also reach out to the Boyle County local government agency.
The local government agency reserves the right to accept or reject any and all bids. Bids will only be accepted through participation in the reverse auction at orbisonline.com.

PUBLIC NOTICE

Legal Public Notice Danville Independent Schools
In accordance with district procedures and records retention guidelines, the following special education records, including personally identifiable information are no longer needed to provide educational services to the student. These records, currently housed at the Danville Board of Education, will be destroyed after July 10, 2024.
Special Education Due Process Records for students who graduated from, left the Danville Independent Schools or have had inactivity in a special education program prior to graduation date of 2018 will be destroyed. It is noted that portions of these records may be needed by the student or parent/guardian for future services or benefits. A record of the student's name, his/her grades, classes attended, grade level completed, and year will be kept permanently. The student (eighteen or older) or parent/guardian may obtain a copy of these records by contacting Amy Robbins, Director of Special Education at 936-8503 no later than June 30, 2024

USES: The Inogen Portable Oxygen Concentrator provides a high concentration of supplemental oxygen for use by patients with chronic respiratory disease who rely on a prescribed oxygen therapy on a prescribed basis. It may be used in home, institution, vehicle, and various mobile environments. DO NOT USE IF: This device is not intended to be used in any way other than as described in the instructions for use. Do not use in parallel or series with other oxygen concentrator or oxygen therapy devices. This device is to be used as an oxygen supplement and is not intended to be life sustaining or life supporting. ONLY use this product if the patient is capable of spontaneous breath, able to inhale and exhale without the use of a machine, and is not using, or plans to use, any respiratory technique used by this device. CONTRAINDICATED in persons whose breathing during normal resting would be unable to trigger the device. Proper device triggering, setup and operation must be confirmed by an experienced clinician or other respiratory professional. Not for pediatric use. Not for use by tech-savvy patients. WARNINGS: The device produces enriched oxygen gas, which accelerates combustion. Do not allow smoking or open flames (e.g. fire) to be present while in use. If you feel hot or uncomfortable, or if the device produces not significant oxygen pulse and/or you are unable to breathe, stop the oxygen pulse, consult your equipment provider and/or your physician immediately. If you are unable to communicate all symptoms, you may require additional monitoring and/or a distributed alarm system. Do not use the information about this device to avoid harm. Use only spare parts recommended by the manufacturer to ensure proper function and to avoid the risk of fire and burns. To avoid danger of choking or strangulation hazard, keep away from children and pets. TALK TO YOUR HEALTH CARE PROVIDER: The oxygen flow setting must be determined and recorded for each patient individually by the prescriber, including the configuration of the device, its parts, and the accessories. It is the responsibility of the patient to periodically reassess the settings of the therapy for effectiveness. The proper placement and positioning of the prongs of the nasal cannula in the nose is critical for oxygen to be delivered.
