THE WOLFE COUNTY NEWS

hunter in Breathitt

A death investigation is

underway after a man died at

an abandoned mine in Breathitt

County last week while hunting

County Coroner's Office, the

incident occurred July 17 at

Old Mine Number Two on

The victim, John Mullins

45, of Magoffin County and

his cousin were searching for

ginseng and yellowroot near

Mine Shaft Road.

According to the Breathitt

ginseng

mine investigated

Uncommon Sense

By Dr. Glenn Mollette

President Trump And Venous Insoufficiency

President Trump probably doesn't want any pictures taken with his feet on his desk. Maybe he never puts his feet on his desk. His recent diagnosis of a venous blood supply problem warrants such a recline two or three times a day. Millions of Americans, especially seniors, deal with ankle and lower leg swelling caused by the flow of blood from the lower leg not returning to the heart as adequately

as it did earlier in life. It's not a debilitating issue unless it's ignored in which case a blood clot could develop in the lower leg or behind the knee. Blood clots are not good as they are not good for the veins. Even worse, a blood clot in the lower leg can travel to the upper part of the body which could be fatal. Thousands of Americans die every year from blood clots that travel to the heart or cause strokes which can be debilitating and fatal.

The smart thing for our President to do is to put his feet up on his desk for ten minutes or so three or four times a day. He can do so when he is talking on his telephone or if he is having a casual meeting. Doctors typically recommend compression socks. There are different grades of compression socks. Some are very light and go on very easy while others are like fighting a war to put on because the compression is so tight. Most people don't particularly enjoy compression socks. However, many testify that once you are used to them you feel better because your legs aren't swelling as much **Death of ginseng** during the day.

Besides compression socks and elevating your legs it's good not to stand in one spot for too long. Walking is great, but just standing in one position can negatively impact the lower leg and the flow of blood as it returns to the heart. Sitting too long creates the same problematic scenario.

The President is doing the right thing by taking an aspirin a day to avoid clotting issues. Most people who develop a blood clot often end up on blood thinner for a while or a lifetime.

Alcohol makes your blood slicker. It doesn't make it thinner as reported by a family physician.

A few years back, I had a pulmonary embolism after receiving my third covid shot so I have some experience to draw from on this.

President Trump can potentially live another robust 20 years or more. However, it's reality, he is getting older and has to take care of himself. .

the mine, and both entered it.

According to investigators, The cousin reported that Mullins went deeper into the mine, but after 5-10 minutes had passed, had not reappeared. The The cousin told investigators that Mullins started to come back out of the mine but collapsed.

Mullins was pronounced dead at the scene just before 11 p.m. No cause of death is known at this time.

The coroner says Mullins' body has been sent to the state medical examiner's office in Frankfort.

NOTICE

In accordance with the requirements of the Public Service Commission ("Commission") as set forth in 807 KAR 5:001, Section 17 and 807 KAR 5:007, Section 3, of the Rules and Regulations of the Commission, notice is hereby given to the member consumers of Jackson Energy Cooperative Corporation ("Jackson Energy") of a proposed rate adjustment. Jackson Energy intends to propose an adjustment of its existing rates to pass through the rate increase of its wholesale power supplier, East Kentucky Power Cooperative, Inc., pursuant to KRS 278.455(2), by filing an application with the Commission on or after August 1, 2025, in Case No. 2025-00215. The application will request that the proposed rates become effective on or after September 1, 2025.

The present and proposed rates for each customer classification to which the proposed rates will apply are set forth below:

Rate	Code	ltem	Present	Proposed
Residential Service	10	Customer Charge Energy Charge per kWh	\$ 30.50 \$ 0.10610	\$ 31.97 \$ 0.11121
Residential Off Peak ETS	11	Energy Charge per kWh	\$ 0.06108	\$ 0.06402
Commercial Service < 50 kW	/ 20	Customer Charge Energy Charge per kWh	\$ 40.72 \$ 0.09839	\$ 42.68 \$ 0.10313
