

Celebrating Constitution Week

A display celebrating Constitution Week was at the Russell County Public Library. The celebration of the Constitution was started by the Daughters of the American Revolution in 1955 when the group petitioned Congress to observe Constitution Week annually, September 17-23. The resolution was signed into law in 1956 by President Dwight D. Eisenhower.

TAXES,

— Continued from Page One

accepted.

Sheriff Polston said tax payers are responsible for ensuring bills are paid regardless of notification, and encourages anyone not receiving a bill through the mail in a timely manner to

contact the sheriff's office.

Payments can be made with cash, checks and credit cards-which are subject to a small convenience fee.

The sheriff's office suggests payments

include bill or account numbers and documentation of paid bills be retained if any questions arise.

The property tax bill collection process officially begins on Wednesday, Oct 1, 2025.

SOLAR,

— Continued from Page One

Public Notice published in The Times Journal said.

Last Thursday, the entity presented information about the "proposed Russell County Solar Park... (to be) located on approximately 450 acres in the vicinity of Old Sano Rd and Bottoms Rd, South of Sano Rd, approximately five miles north of Russell Springs."

Some citizens attending the meeting at the Russell County Public Library, in Jamestown, questioned the status of a similar project announced almost three years ago in which a solar facility was to be

constructed in the Mt. Olive area.

A representative for Round Trip, LLC said the current, proposal is not connected to the former project.

The representative said his company may visit the Russell County Fiscal Court as early as next month to discuss the project and offer details.

The recent public meeting included "an overview of the project, answers to common community questions, and responses to questions submitted."

The proposed "photovoltaic solar project" will consist of "solar panels installed on

racks with an approximate maximum height of 15 feet, inverters, transformers, an energy storage system, associated wiring and balance of system, and a substation," a public notice said.

"The power generated by the project will be linked to the electric transmission grid via direct connection an existing EKPC transmission substation on or near the property," published information said. "The project will install a visual vegetative buffer along portions of the perimeter of the project two staggered rows of native, ever-green plantings."
