UofL Theatre Arts and African American Theatre Program Presents "Pipeline"! Pipeline, this powerful and timely drama by acclaimed playwright Dominique Morisseau comes to the University of Louisville for a limited run in February. Set against the backdrop of America's education and criminal justice systems, Pipeline follows Nya, a dedicated public school teacher and single mother, and Omari, her son. When a heated incident threatens to derail Omari's future, Nya must confront painful questions about race, class, power, and what it truly means to protect the people we love. The play challenges audiences to consider how schools can become conduits to opportunity-or pipelines to incarceration-and what it takes to interrupt that cycle.

Performances of Pipeline will take place at the Thrust Theatre (2314 S. Floyd St) Feb. 20th, 21st, 27th, 28th @ 7:30pm, Feb. 22nd, Mar. 1st @ 2:00pm. Tickets are \$10 for Students, \$15 for Alum, Seniors, and UofL Faculty/Staff, and \$20 for General Admission and are available at Louisville.edu/TheatreArts or at the Box Office at 2314 S. Floyd St. taboxoffice@louisville.edu 502-852-6814

Engineering / IT

TITLE: Production Engineer

POSITION IS LOCATED AT: Component Supply LLC, 209 Quality Avenue, Suite 1A, New Albany, IN 47150

DUTIES: Production Engineer Job Duties: Growing light manufacturing environment. Designs, implements, manages and participates in all aspects of additive and injection molding manufacturing processes - applying engineering principles, statistical techniques, simulation software, CAD design, 3D printing machine operation, and understanding of rheological properties of polymers. Works with customers and other manufacturers to introduce products from prototype phase to scalable manufacturing. Coordinate experiments and process validations on new and revised products and processes.

Interface with product engineers, tooling engineers, supplier groups, and designers to create manufacturing processes for new polymer components. Hires, manages, supervises, and directs work of personnel involved in parts production. Manages production shop to optimize and implement effective manufacturing solutions for new part designs. Trains team on equipment, processes, development runs of new components/molds, and all revisions, up to and through the operational manufacturing process. Actively and daily works alongside team in production, assembly, quality control, packaging, shipping and receiving of products. Characterize and develop processes/process specifications, which are safe, cost effective, provide quality parts and maximize machine utilization.

Develops tool design concepts, participates in procuring tooling (including purchase requisitions, and specification definition). Develop secondary fixture design concepts and participate in procuring secondary tooling including capital requests, equipment specification, purchase, installation and validation. Provide technical information on new products and processes to President. Maintain and share knowledge of materials and processes to maximize performance. Create concept proposals and technical specifications, perform cost reduction and manufacturing feasibility studies. Optimize product flow by implementing lean molding strategies.

Develops, implements, and maintains Quality Management System (QMS) ensuring conformance to customer, internal, ISO 9001, IATF 16949, OSHA and regulatory/legal requirements. Requires vendor quality systems, inspection of incoming materials, monitoring, measurement, and review of internal processes that affect the quality of the organization's products. Document control and creation compliant to Quality Certification.

Capable of leading a team of Quality engineers, inspectors, auditors, analysts, and technicians. Work with customers, employees, overseas vendors and outsourcing firms to develop and meet product requirements. Report to President on the performance of the QMS (e.g., results of quality audits, corrective actions), including the need for improvement. Oversee product recalls and customer complaints New Product launch Coordinator - PPAP, FMEA, DFMEA, CP. Responsible for accuracy and timely inspection/calibration of monitoring and measuring devices. Create and maintain error proofing and safety processes.

ESSENTIAL DUTIES AND RESPONSIBILITIES INCLUDE BUT ARE NOT LIMITED TO THE FOLLOWING: Addendum for Section F.b.1.b: Other major(s) and/or field(s) of study required Industrial Engineering, Mechanical Engineering, Electrical Engineering, or Materials Science.

Addendum for Section F.b.4.b: Job Requirements Occupation - Managing a light additive manufacturing environment.

Addendum for Section F.b.5.a(iv): Special Skills, Other Special Skills or Requirements - Willingness and ability to become licensed forklift driver and daily participate in each stage of the manufacturing process physically working alongside team members to produce and deliver product.

Any person interested in this position may apply to: Component Supply LLC
