Homes

Engineering / IT

Fives Intralogistics Corp. has openings for Controls Software Engineer at its facility in Louisville, Kentucky.
Job duties include:

- Participating in review of the project scope to ensure compliance with customer's standards and the development of the control's systems architecture representing an accurate picture of the design required
 - Participating in the design of electrical schematics including wiring diagram for parcel sortation and transportation products or projects with engineering principles, company standards, customer contract requirements, and related specifications.
 - Interpret electrical schematics, mechanical layouts, and client requirements to design Allen-Bradley PLC programs tailored for high-speed sortation systems and conveyors using engineering and design software and equipment to perform engineering tasks.
 - Troubleshooting and debugging Allen-Bradley PLC, HMI/SCADA programs by conducting system commissioning at customer locations, integrate with WCS and external equipment, and perform SAT/FAT testing to ensure system readiness utilizing industrial communication protocols including EtherNet/IP, Profinet, and OPC.
 - Development of scalable HMI/SCADA solutions on FactoryTalk View SE and ME, enhancing diagnostics and remote alarm monitoring for efficient system maintenance and minimal downtime.
 - Develop and implement custom ladder logic or structured text for material system hardware design using Allen-Bradley PLC, enhancing system capabilities and performance.
- The position requires a Bachelor's Degree in Engineering and 2 years of experience working in the Intralogistics Material Handling industry as a Controls Software Engineer, Controls Engineer or other controls engineering positions. Two years' experience required in each of the following:
- Working with programming Allen-Bradley PLCs and HMI/SCADA systems.
 - Develop ladder logic or structured text to control material system hardware design.
 - Working with industrial communication protocols including EtherNet/IP, Profinet, and OPC.
 - Troubleshooting and debugging Allen-Bradley PLC, HMI/SCADA programs.
 - Reading electrical schematics, wiring diagrams, and control system architecture.
- Experience may be obtained concurrently.
Applicants should apply online at
<https://jobs.fivesgroup.com/en/>
and reference Controls Software Engineer.
