JPI JOB NETWORK

ENROLLMENTS

Continued from page nine

Initiative: Prioritizes water quality practices on the land that, if enrolled, will help reduce sediment loadings, nutrient loadings, and harmful algal blooms. The vegetative covers also contribute to increased wildlife populations.

CLEAR30 (a component of the CLEAR Initiative): Offers additional incentives for water quality practice adoption and can be accessed in 30-year contracts.

Highly Erodible Land Initiative (HELI): Producers and landowners can enroll in CRP to establish long-term cover on highly erodible cropland that has a weighted erodibility index greater than or equal to 20.

Conservation Reserve Enhancement Program (CREP): Addresses high priority conservation objectives of states and Tribal governments on agricultural lands in specific geographic areas.

State Acres for Wildlife Enhancement Initiative (SAFE): Restores vital habitat in order to meet high-priority state wildlife conservation goals.

General CRP (Signup 66)

General CRP offers are submitted through a competitive bid process. After the enrollment period closes, General CRP offers are ranked and scored by FSA, using nationally established environmental benefits criteria. USDA will announce accepted offers once ranking and scoring for all offers is completed. In addition to annual rental payments, approved General CRP participants may also be eligible for cost-share assistance to establish long-term, resource-conserving vegetative cover.

Producers and landowners interested in participating in CRP should contact their local FSA county office.
