

SPRING

FROM PAGE B1

to raise to furnish the building. Donations can be made in person or mailed to our office at 1650 West Second Street Owensboro, KY 42301 or online at www.seniorcenterodc.com. If you

are a business interested in making a significant contribution, please contact me directly to discuss.

Our brick fundraiser is off to a great start with 4 by 8 bricks offered for \$125 and 8 by 8 bricks for \$500. These bricks will be placed in a great location on the new facility site. You can visit our website or

Facebook page for more information or stop by the office.

Perhaps you love what we do at the Senior Community Center, and you'd like to be an ongoing supporter by registering as a "Friend of the Senior Center."

These supporters are giving \$50 per month or donating one annual gift of

\$600. You can contact me for more information.

I love to tell the story of what we do at the Senior Community Center. If you have a group who would like to learn more, please reach out to me at davidtucker@seniorcenterodc.com to schedule a speaking engagement.

As you can see from the statistics I shared last month and all the wonderful activity currently taking place, we have a reason for a spring in our step. We exist to serve the seniors of Daviess County and the families they belong to. Come be part of our

family and let's have some fun together!

Dr. David Tucker is the executive director at the Senior Community Center of Owensboro Daviess County.

BRAIN

FROM PAGE B1

Because the researchers identified the specific path the energy takes, they believe existing drugs — such as those used for epilepsy or diabetes — could potentially be used to restore harmony to the brain's metabolism. The hope is that these interventions could reverse sleep-disrupting symptoms and improve quality of life today, even as researchers continue to work toward a long-term cure.

In the meantime, the team encourages actively creating all the right elements for regular, consolidated sleep

during nighttime hours to slow the progression of the Alzheimer's and prevent caregiver burnout.

"Until there are more disease-modifying treatments, it is critical to highlight factors, like sleep, that individuals can modify to reduce vulnerability," said Irmen. "Connecting these basic science findings to meaningful public impact is especially important for the community."

The goal now is to take these findings and build upon them.

"Maybe there are ways we can ease symptoms associated with Alzheimer's disease and dementia without having a complete cure," said Macauley. "We're going to get there, but short term, I'll take this as a win."
