What would be your top priority if elected and/or what is the biggest issue facing this office?

I promised not to raise taxes prior to being elected and in fact have

lowered Property Taxes twice. Increasing funding from the State by reducing the unfunded mandates.

How would you balance economic growth with conservation?

One of the most pressing challenges facing modern societies is finding an effective balance between economic growth and environmental conservation. Achieving this balance requires a thoughtful approach that recognizes the importance of both robust economic development and the preservation of natural resources for

future generations. Governments and businesses must collaborate to implement policies that encourage sustainable practices, such as investing in renewable energy, promoting green technologies, and supporting industries that minimize their ecological footprint. By fostering innovation and incentivizing environmentally responsible behavior, economies can continue to grow without sacrificing the integrity of ecosystems. Furthermore, public awareness campaigns and educational programs play a crucial role in shaping consumer habits and encouraging

individuals to make choices that support conservation efforts. Ultimately, the path to sustainable growth lies in integrating economic objectives with environmental stewardship, ensuring that prosperity does not come at the expense of the planet's health. As communities strive for progress, it is imperative to prioritize

long-term sustainability, so that economic achievements are accompanied by the continued vitality and diversity of existing environment.

Democratic Magistrate District 7 candidate Suzette Mushlin was not included because she does not have opposition in the primary.
